

Kistler Automotive – Your Partner for Automotive Safety and Comfort

As a technology leader in the vehicle dynamics & durability testing market Kistler provides sophisticated system solutions for measuring the related forces, torques, motions/kinematics and accelerations.

As a development partner of the automobile industry, Kistler Automotive pursues the goal of providing vehicle manufacturers and system suppliers in addition to our high-precision sensors complete vehicle measurement system solutions.

Kistler has supported automobile development with high-end instrumentation for decades. Rather than just as a supplier of sophisticated technology, the company regards itself as a development partner and provider of comprehensive measurement solutions.

Its portfolio is well rounded with a variety of support and services, and an international organization ensuring worldwide proximity and expert advice.

RoadDyn® and Correvit® are registered trade marks of Kistler Holding AG.
